

FOR IMMEDIATE RELEASE:

Brandywine Airport Announces Changes In Airport Management Staff

West Chester, Pa. March 4, 2014—With its excellent West Chester location, Brandywine Airport is the most conveniently positioned public use and general aviation airport for corporate or personal flights into Philadelphia and its ever-growing western and surrounding suburbs. To support the over 60,000 flight operations at the airport each year, the Board of Directors of the New Brandywine Airport Club, the corporation which operates the facility, has named John Kassab as Airport Manager and Jeff Suveg as Assistant Manager.

Kassab, a fixed wing private pilot since 1979 and member of the New Brandywine Airport club since 1996, has been employed on a part time basis by the airport for the previous 18 months and full time as the Assistant Airport Manager for the last 6 months. “His numerous years of supervisory experience and fiscal accountability as the former owner and operator of the Bailey Printing Company of Media, Pa, made him a natural fit for the position”, explains Frank Blatcher, President of the Board of Directors for the New Brandywine Airport Club.

Suveg has been employed with Brandywine Airport for over 4 years as a line crewman and as well as assisting with general administrative responsibilities. Additionally, he has over 7 years of technical aviation experience having worked for Keystone Helicopter Corporation, Sikorsky Aerospace Services and Penn Avionics, based at Brandywine Airport.

Located on Ward Avenue, adjacent to the Helicopter Museum, Brandywine Airport offers an array of services for pilots and the public alike. Open daily from 8am to 5pm, pilots will find fuel service at the lowest advertised price in the region, available hangar and tie-down space, maintenance service provided by Flight Dynamics, Penn Avionics and several independent aircraft maintenance mechanics, free Wi-Fi in the FBO, a pilot shop, crew lounge and crew car as well as car rental service through Enterprise Rent-A-Car. Fixed wing flight instruction through TAS, Inc., helicopter flight instruction, sightseeing tours and aerial photography are available to the public through Liberty Aviation Transportation and Liberty Flight School.
